

ATLAS

Lift & Slide Window System

Sobinco Integrated

Atlas balances elegance with engineered ease. This aluminium lift-and-slide window system features ultra-slim sightlines and expansive openings for maximum openness without sacrificing strength. Built to advanced building-physics standards, Atlas delivers smooth operation, reliable performance, and lasting precision.

"Atlas carried the weight of the sky.
ATLAS moves that weight with one finger."

Highlights

ATLAS lift-and-slide system is engineered for effortless movement, allowing the sliding sash to transition seamlessly from a lifted position to smooth, controlled sliding, and back again. The operation is elegantly simple: lift to unlock, slide with ease, and lower to secure.

Atlas Lift-Slide system comes with an **Sobinco** Integrated hardware functionalities;

Sobinco

- Best Hardware Integration
- Sound Insulation
- Water Resistance
- Effortless Operation
- Design Aesthectics
- Efficient Fabrication & Installation

Designed for refined modern spaces, Atlas delivers a clean, flush aesthetic with a minimal, slim interlock. With no visible keepers, no added projections, and flush framing on all four sides, the system achieves a perfectly aligned, uninterrupted look that enhances both form and function.

Technical Specifications

GlassThickness	18 mm to 42 mm
Central Node	Slim interlock 25 mm only
2 Track Width	155 mm
Frame Sideline with Shutter	118 mm
Max. Single Sash Width	1800 mm
Max. Single Sash Height	3600 mm
Max. Single Sash Height	Upto 440 Kg
Vent Weight	Premium Solution with 2 hooks, expandable with 1 or 2
Locking System	extra stainless steel hooks.
	Key Cylinder Locking also possible for more security.
