

TRUSS

Door System

"A truss makes the whole stronger than any single part."

Sobinco Integrated

TRUSS redefines door systems by combining structural strength with modern, minimalist design. Engineered with robust framing, concealed hardware, and a refined profile, it delivers a clean architectural presence inside and out. Rigorously tested for performance, TRUSS ensures smooth operation, a reliable seal, and long-term durability. Keeping spaces secure, stable, and visually uncompromised.

Pivot Door

TRUSS

ENGINEERED TO INSPIRE

AMMORE SYSTEMS have designed an opulent Lift & Slide window system in association with **Sobinco**, a prominent European company foraying into extraordinary hardware solutions.

The product of this collaboration is the striking "TRUSS" Door system, in which Sobinco's top-of-the-line hardware "STILLETO HINGES AND ORCA LOCKING SYSTEM" and AMMORE system have played a significant role.

TRUSS

"A truss makes the whole stronger than any single part."

Technical Specifications

Door frame	50 mm
Frame sideline with shutter	112 mm
Max. Single door width	1200 mm
Max. Single door height	3000 mm
Glass thickness	6 mm to 30 mm
Single door weight	Upto 200 Kg
Corner joints	45 Degree
Finishes	Powder coating, wooden finish, architectural shades, anodizing
Locking system	Key cylinder locking

Max height:

3000 mm

Available Configurations:

Single door

Double door

Sobinco

TRUSS Door system comes with an **Sobinco** Integrated hardware functionalities;
